

LIVE BETA

Solis AI

The AI agent for content repurposing.

Raising \$100k–\$300k

Live product • Initial monetization • Built for scalable AI video workflows

AI WORKFLOW

Analyze content

Find high-value moments

Generate short-form

Customize & publish

The Problem

Content is everywhere. Turning it into consistent short-form content is still fragmented.

01 Find the moments

Creators and teams spend time searching long videos for moments worth clipping.

02 Edit repeatedly

Clipping, captions, layouts, overlays and formatting often require multiple tools.

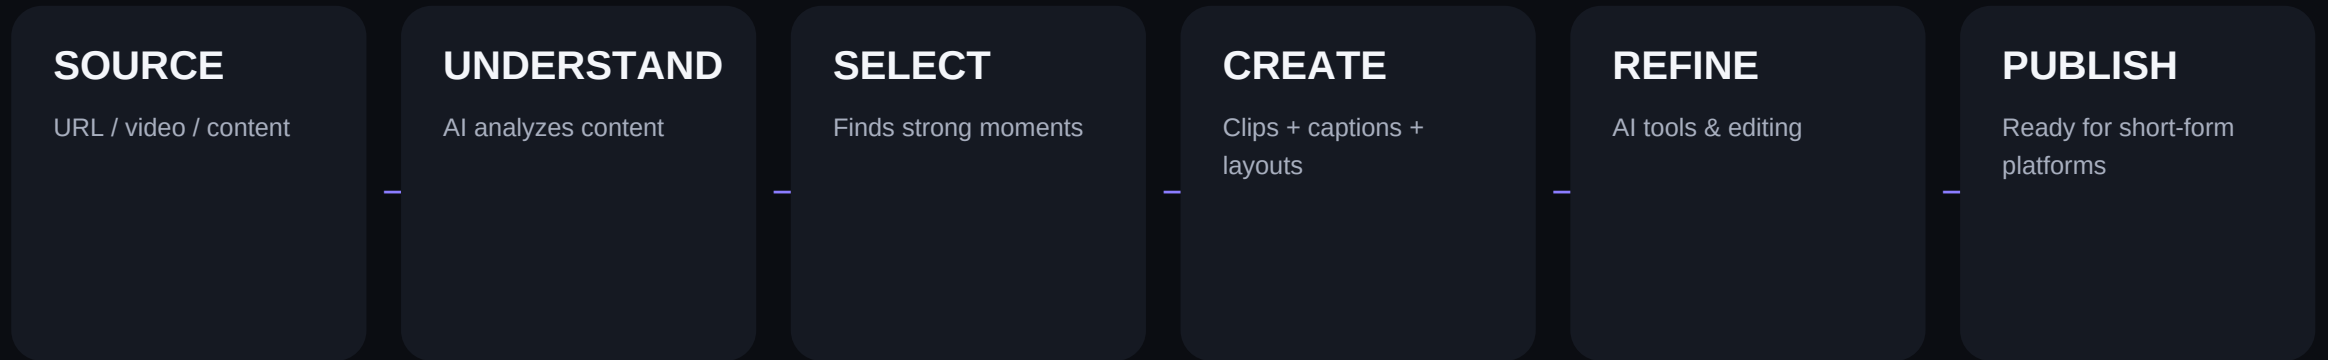

03 Repurpose at scale

The more content a business produces, the more manual work the workflow creates.

Solis AI is designed to collapse that workflow into one AI-native product.

The Solution

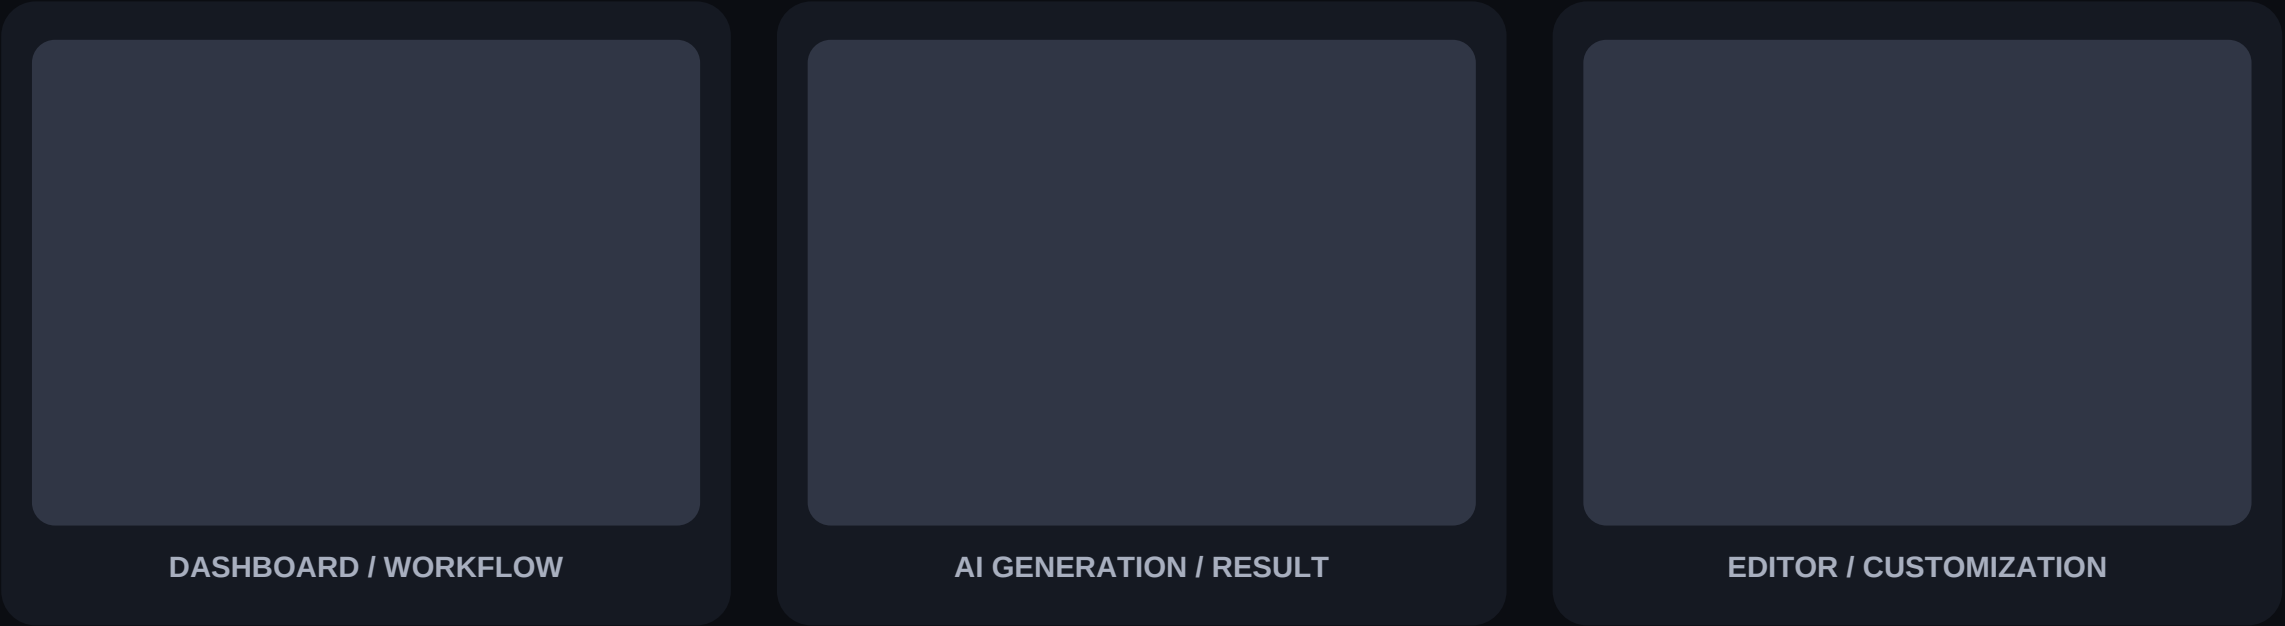

One workflow from source content to ready-to-publish short-form video.

The product is already live; the next phase is improving reliability, expanding automation and scaling adoption.

Product

A live AI content-repurposing platform — not a concept.

Replace these three panels with real Solis AI screenshots before investor submission.

Why Solis AI

An AI-native workflow designed around the actual content repurposing job.

AI clipping

Identify strong moments from long-form content.

AI suggestions

Context-aware recommendations for what to create.

Subtitles

Automatic captions built into the workflow.

Templates

Purpose-built short-form formats and layouts.

Editing

Refine outputs without leaving the platform.

Reconstruction

Experimental AI capabilities such as Overpurpose expand the workflow.

Early Validation

Live product + real users + initial monetization. Replace placeholders with verified numbers.

What we are validating

Users are actively testing the live beta, providing product feedback, and early customers have already demonstrated willingness to pay. The next objective is turning this initial signal into repeatable recurring revenue.

Important: all traction figures will be replaced with real, verifiable numbers before submission.

Business Model

Freemium entry point with subscription tiers for higher usage and capabilities.

FREE 1 generation/day • watermark • limited storage	BASIC \$9.99/mo • 5/day • 75/mo	PRIME \$23.99/mo • 10/day • 200/mo	ELITE \$39.99/mo • 20+/day • 400/mo
---	---	--	---

Pricing shown is the current beta structure and can evolve as usage economics and customer demand are validated.

Opportunity

Content repurposing is a recurring workflow across creators, media teams and businesses.

CREATORS

Turn long-form content into more short-form output.

PODCASTS & MEDIA

Multiply distribution from every episode.

AGENCIES

Repurpose client content efficiently.

MARKETING TEAMS

Produce more platform-native content with fewer manual steps.

The opportunity is not just clipping videos — it is automating the content repurposing workflow.

What \$100k–\$300k Unlocks

Capital is intended to accelerate a live product into a scalable business.

PRODUCT & AI

Improve generation quality, reliability and new AI capabilities.

INFRASTRUCTURE

Scale GPU/API capacity and production reliability as usage grows.

GROWTH

Test repeatable acquisition channels and expand the user base.

OPERATIONS

Cover essential legal, accounting, software and business infrastructure.

Target outcome: Turn initial product validation and monetization into repeatable, scalable revenue.

Solis AI is raising \$100k–\$300k

to accelerate product, infrastructure, growth and recurring revenue.

The ask

Solis AI is already live. We are seeking capital and strategic support to scale what is working, improve the product, and turn early monetization into a repeatable growth engine.

Why now

- Live product
- Initial monetization
- Real user feedback
- Clear product expansion path
- Capital can accelerate the next stage
